

CIVIL CONSTRUCTION AND PLANT TRAINING SPECIALISTS

We are an RTO called Signature Learning and Development, RTO # 45762, we specialise in:

- **Cert III Civil Construction – Road construction and Maintenance**
- **Cert III Civil Construction – General**
- **Cert III Civil Construction – Bituminous Surfacing**
- **Cert III Surface Extraction**
- **Cert III Civil Plant operations**
- **Cert IV WHS**
- **Cert IV Leadership and Management**
- **Cert III Business Administration**
- **Multiple short / compliance courses as listed**

We are fully funded under Smart and Skilled for both the Certificate III Civil and the Certificate III Plant Operations qualifications. We also have access to Training Services NSW funding for part qualifications and single units such as plant competencies.

We currently cover NSW delivering these qualifications as we are one of the few RTOs in NSW that can effectively deliver the full Road Construction and Plant Operations qualifications on the job.

Signature Learning and Development combine the most innovative and effective delivery models that work with employers to complete qualifications with minimal disruption to work. For more experienced, existing worker apprentices, we move through theory quickly in clustered assessments and carry out practical assessments on the job site during work hours, a method that has been well refined over the past 5 years through experience with many companies and employers across NSW.

We concentrate on skill sets such as plan reading, levels and calculations. We can usually get these funded from Training Services NSW and deliver them to cohorts of leading hands and supervisors in Local Government to up skill them practically and prepare them for internal elevation. Designed to be relevant in the majority of workplaces, the Certificate IV in WHS qualification is well suited to a variety of roles where WHS tasks are performed beyond entry level expectations of all workers.

We can also offer new entrant traineeships for Certificate IV in WHS, Certificate IV in Leadership and Management and Certificate III in Business Administration. The Leadership and Management and Business Administration qualifications are great for those in supervisory or administrative roles looking to expand their knowledge of the expectations and processes required within their position.

Signature Learning and Development have a really simple "no rot, no middleman" approach that resonates well and makes for efficient, customised and smooth processes, which is an aspect that the bigger RTOs cannot compete with.

Please don't hesitate to call directly to discuss as we are currently planning out 2023 and would like to be a part of your training program in some way.
